Recent business achievement

We are very excited about our new website

(www.mufflercentre.co.nz) which will be launched in January and has room to continue into wholesaling online to our customers as well as providing all information required about exhausts.

How did you first hear about Capricorn Society?

We had heard from many of our trade customers about the great opportunities Capricorn had to offer.

What do you consider the benefits of being a member?

It is fantastic to get one statement to pay and it makes for quick and easy accounting; leaving time to focus on other parts of the business. We find it very interesting to use the new website CAPeziparts to source any part for our industry when we are unsure where to start looking. Our Area Manager Malcolm Matthews, is always a great source of information and keeps us up to date with what is happening in other centres.

Technical tip you would like to share with other members?

There is an old saying in business, you can make friends in business but you can't make business out of friends. We have found this very true and a great philosophy to have.
